As an innovative, passionate **Frontend Developer**, I love turning ideas into reality through my code. I have been coding for seven years, started as a self-taught programmer, and continued to refine my skills through academic pursuits. With a strong foundation in HTML, CSS and JavaScript and experience in React, TypeScript and NodeJs, I am skilled at developing responsive and user-friendly web applications. I like to be challenged, keep an open mind and stay up-to-date with the latest trends and developments in my sector. With a keen eye for detail and a passion for delivering high-quality products, I am ready to contribute my expertise to help you create web solutions.

EDUCATION

FALMOUTH UNIVERSITY Bachelor's Degree, BSc (Hons) in Software Engineering, [*First-Class (1)*], 2023.
[*Mobile App Development (React Native), Machine Learning and AI, IoT Project*]
ICON COLLEGE National Diploma, HND in Computing, [*Distinction*], 2022.
[*Web Development (JavaScript), Databases, Data Structures and Algorithms*]
